

DALLAS FORT WORTH INTERNATIONAL AIRPORT AND DALLAS LOVE FIELD

Dallas Fort Worth International Airport is an economic engine for the region, generating \$37 billion in economic impact annually. Built in 1974 and situated between Dallas and Fort Worth, it is the highest-capacity commercial airport in the world and one of two international gateway airports in Texas.

As a major hub of Fort Worth-based American Airlines, Dallas Fort Worth International Airport offers business travelers a high-frequency schedule and access to any major city in the continental United States in less than four hours. Cargo operations, which amounted to 918,130 metric tons in 2018, serve 34 major markets around the world, including several key markets in Asia. DFW Airport is upgrading its four original terminals with a \$2.7 billion dollar 'Terminal Renewal and Improvement Program' (TRIP) and is expected to be completed in 2020. DFW Airport will host 165 gates in 2019, with plans for 20-30 more when a planned Terminal F is completed.

Located just seven miles from downtown Dallas, Dallas Love Field is a convenient general-use airport that serves as the headquarters for low-cost carrier Southwest Airlines. The airport, which served more than 16.2 million passengers in 2018, underwent a \$519 million modernization renovation, including a centralized terminal with 20 gates, a new lobby, and an expanded baggage claim area. Construction is also underway on an expanded passenger garage.
