Mobility 2045

Mobility 2045 serves as a fiscally responsible blueprint for the region’s long-term multimodal transportation needs. The plan, adopted by the Regional Transportation Council in 2018, provides a range of transportation options to serve Dallas-Fort Worth now and into the future.

As the region grows from approximately 7.5 million residents today to an estimated 11.2 million by 2045, it will require an integrated, easily navigable transportation system of roads, public transportation, and bicycle and pedestrian facilities, complemented by local policies and programs to enhance infrastructure investment in even more publicly accessible options. These efforts to provide transportation choice to the traveling public and improve the quality of life driving the region’s growth are detailed in Mobility 2045.

Funded Recommendations

Mobility 2045 represents a $136.4 billion blueprint for the continued maintenance and development of the regional transportation system over the next 20 plus years. Mobility 2045 compiles with all federal requirements related to the financial aspects of the metropolitan transportation plan. As the Dallas-Fort Worth region continues to grow, additional solutions will be imperative to comprehensively address the ever-increasing transportation needs.
