OUR PEOPLE

Advisory & Project Management - we collaborate with you to build and execute a custom playbook based on your exact needs.

Subject Matter Expertise in COVID Testing - we have the healthcare expertise and knowledge base to inform the right testing protocol for your company and employees.

Physician & Advanced Practice - these temporary providers can assist in providing care as well as screenings for your employees.

Nurses & Allied Professionals - based on your custom return to work strategy, we can scale with you to provide the talent you need.

OUR SOLUTIONS

Custom Playbook for COVID Testing Workflow - partnering with you, we can provide a custom playbook that outlines the steps we can take to ensure your employees are properly tested, retested, cleared for work - and more.

Temperature Checks - staffing to ensure that each and every employee receives a temperature screening upon entering the workplace each day will reduce the spread and ensure any sick employees are treated or quarantined early on.

On- & Off-Site Screenings - we can provide your employees with access to a digital questionnaire that can screen employees on- or off-site.

Quarantine Management - if an employee tests positive for COVID, we can identify a clear strategy for quarantine as well as follow-up and retesting procedures.

COVID Testing - whether an employee has a high temperature or you'd like to screen all employees prior to resuming business, we can assist in administering COVID tests to ensure confidence in the workplace.

Contact Tracing - if an employee tests positive for COVID, our team has the tools to help with contact tracing in order to quickly identify and notify other employees who might have come in contact with the infected individual.

Diagnosis - we can provide the resources needed to provide a diagnosis regarding COVID tests.

On-Site Clinic Support - resources to staff your on-site clinic will provide a safe place for employees to turn for swabbing, temperature checks and more.

OUR TECHNOLOGY

Telehealth - many employers are utilizing Telehealth capabilities as a cost-effective way to scale access to providers and expand the reach of those resources across sites.

Interpretation & Communication - AMN has a unique capability to enable interpretation services in hundreds of languages through a centralized, cloud-based system, ensuring communication with employees of all backgrounds.
