

# Dallas Fort Worth International Airport and Dallas Love Field

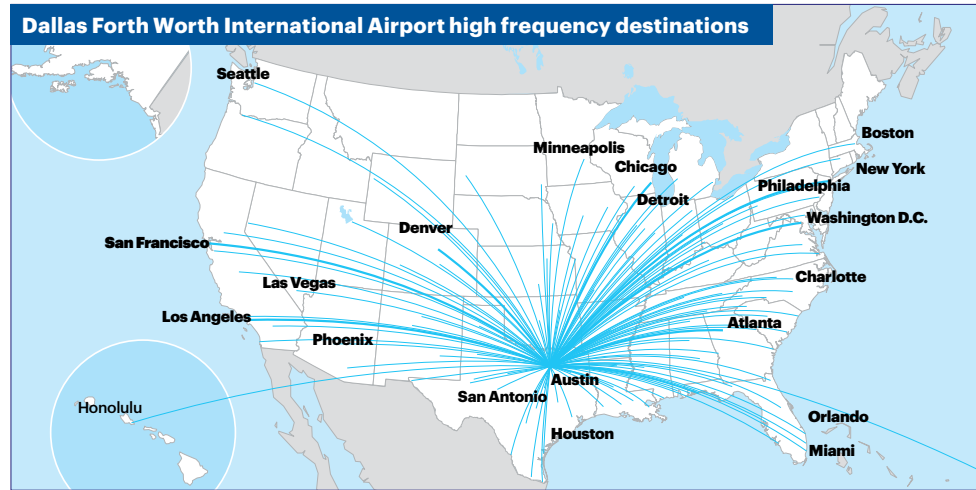

Dallas Fort Worth International Airport is an economic engine for the region, generating \$37 billion in economic impact annually. Built in 1974 and situated midway between Dallas and Fort Worth, it is the highest-capacity commercial airport in the world and one of two international gateway airports in Texas.

As a major hub of Fort Worth-based American Airlines, Dallas Fort Worth International Airport offers business travelers a high-frequency schedule and access to any major city in the continental United States in less than four hours. Cargo operations, which amounted to 871,593 metric tons in 2020, serve 28 major markets around the world, including several key markets in Asia. DFW Airport recently completed upgrades to four of its original terminals with a \$2.7 billion Terminal Renewal and Improvement Program (TRIP) and currently hosts 164 gates flying to 227 destinations. In 2021, DFW will begin renovation of its 5th original terminal "C," a 28-gate hub for American Airlines. Construction of a new Terminal "F" will add capacity for up to 24 additional gates when demand for air travel rebounds.

Located just seven miles from downtown Dallas, Love Field is a convenient general-use airport that serves as the headquarters for low-cost carrier Southwest Airlines. The airport, which served more than 7.7 million passengers in 2020, underwent a \$519 million modernization renovation, including a centralized terminal with 20 gates, a new lobby, and an expanded baggage claim area. An expanded passenger garage completed in 2019 added 5,000 parking spots.

## Dallas Fort Worth International Airport by the numbers (2020):

- Daily Passengers: **107,849**
- Total Passengers: **39,364,990**
