

Superior combination of location and access featuring DFW Airport, major highways, and rail

“Everything is bigger in Texas” is a familiar phrase that also applies to the Dallas-Fort Worth region, which has a footprint larger than some U.S. states.

Dallas-Fort Worth is the nation’s fourth-largest metro area. Its central location provides convenient access to all major markets in the U.S. and in the North American trade partnership.

The region functions as a logistics and distribution hub, giving businesses an edge by putting key markets within easy reach of air, truck, and rail cargo shipping.

For business travelers, DFW’s location in the central U.S. means time savings when it comes to travel. All major U.S. cities are less than four hours away.
