

Dallas Fort Worth International Airport and Dallas Love Field

Dallas Fort Worth International Airport is an economic engine for the region, generating \$38 billion in economic impact annually. Built in 1974 and situated midway between Dallas and Fort Worth, it is one of the highest-capacity commercial airports in the world.

As the headquarters and major hub of Fort Worth-based American Airlines, DFW International Airport offers business travelers a high-frequency schedule and access to any major city in the continental United States in less than four hours. Cargo operations serve 39 major markets around the world, including several key markets in Asia. DFW Airport recently completed a \$2.7 billion upgrade to four of its original terminals. A \$1.5 billion renovation of its 5th original, and busiest, Terminal C included the installation of innovative modular gates in 2022. A new Terminal F broke ground in November 2024 which, with additional improvements to Terminals A and C, will ultimately add 24 new gates and a new Skylink station.

Located just seven miles from downtown Dallas, Love Field is a convenient general-use airport that serves as the headquarters for low-cost carrier Southwest Airlines. The airport, which served more than 16 million passengers in 2024, recently underwent a \$519 million modernization renovation, including a centralized terminal with 20 gates, a new lobby, and an expanded baggage claim area. DART services Love Field with the “Love Link” providing connections to the Green and Orange lines.

Dallas Fort Worth International Airport By the Numbers (2024):

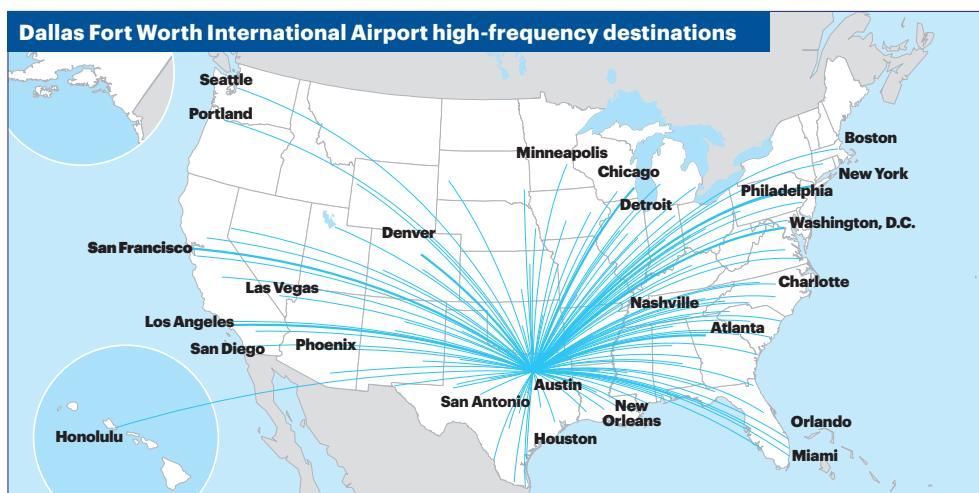

Average Daily Passengers: **240,597**

Total Passengers: **88,817,864**
